

IAGO IAGO

Venice, 2009. Iago is a very talented student of architecture, of humble origins.

Desperately in love with blonde Desdemona, restless daughter of the Rector, Iago is just one step away from asking for her hand and from designing the ideal city, when Otello, son of a world famous architect friend of the Rector, grabs everything away from him.

Usurped the position of project supervisor for the Biennale preparations, and deep in Desdemona's heart, Otello becomes Iago's enemy to be defeated. In the Venetian white nights, Iago will have only one goal: destroy Otello's life, shatter his certainties. He will be helped in the undertaking by the cunning Emilia and the fickle Roderigo. Freely inspired by "Othello" by William Shakespeare.
