

NORMAL NORMAL

Original and visually daring, **NORMAL** is a genre-bending documentary that reflects on how female and male identities are performed in everyday interactions, through a collage of immersive scenes filmed all over Italy. Capturing some of the most iconic moments in people's life, from birth to adulthood, **NORMAL** reveals how our gender defines us in most of the things we do, affecting our gestures, desires, behaviours, and aspirations.

At the gym or at the beach; in a disco or in a church; at funfairs, public parks and beauty centres: **NORMAL** explores the collective choreographies of gender in ordinary and familiar situations, resulting in a ballet of moving images that depict the events while simultaneously meditating on their significance. Do we live in a world of constant performance? With its open form and contemplative pace, **NORMAL** offers a riveting experience into the spectacle of gender in everyday life, inviting the audience to question and unravel the very idea of normality.
